

# Top Los Angeles County Public Schools for Underserved Students 2019

**There is no achievement gap at birth.<sup>1</sup> It's time to stop questioning what low-income students of color can achieve in school and time to start focusing on learning from the public schools that are beating the odds.**

When offered equal access to rigorous coursework, strong instruction, deep engagement, and teachers with high expectations, all students -- regardless of race and ethnicity -- achieve at high levels, oftentimes closing achievement gaps.<sup>2</sup> Unfortunately, many kids are being failed by school systems that are not equipping them to achieve their full potential. Many factors hold kids back: extreme poverty, systemic racism, language barriers, and struggles at home or in their community. These are compounded by limited funding to schools, and district and statewide policies and practices that don't work.

But some public schools are finding ways to help all of their students succeed, despite the many socioeconomic challenges and barriers in our public school system. These schools are currently the exception, not the rule. But they each show us what a single school can do. They show us what is possible despite the odds.

This report highlights those schools closing the achievement gap for low-income African American and Latino students in

Los Angeles County. Since 2015, we have produced the *Top Public Schools for Underserved Students* report annually for Bay Area schools. This is our first year producing the report for Los Angeles County.

To qualify, schools must close the achievement gap for their low-income Black or Latino students.<sup>3</sup> They must beat the statewide average in one or more factors including math and reading scores, college eligibility rates, and suspension data. Still, when you talk to leaders of schools on this list, they will tell you that reaching the statewide average is not enough. Of the one million low-income African American and Latino students in Los Angeles County, only 15% of them attend a Top Public School.

There is much work yet to be done for Los Angeles' students, but our list highlights the schools that are leading the way. We hope educators, civic leaders, parents, and students across Los Angeles can get inspired by their example. We believe all schools in Los Angeles County can become Top Public Schools.

## Few schools in Los Angeles County are closing the gap for low-income African American and Latino students.

### Low-income Latino

Source: California Department of Education, 2017-18 Enrollment files  
\*Schools were considered in this analysis if they had at least 20 low-income Latino students and this sub-group comprises 43% or more of the school's overall enrollment.

### Low-income African American

Source: California Department of Education, 2017-18 Enrollment files  
\*\*Schools were considered in this analysis if they had at least 20 low-income African American students and this sub-group comprises 4% or more of the school's overall enrollment.

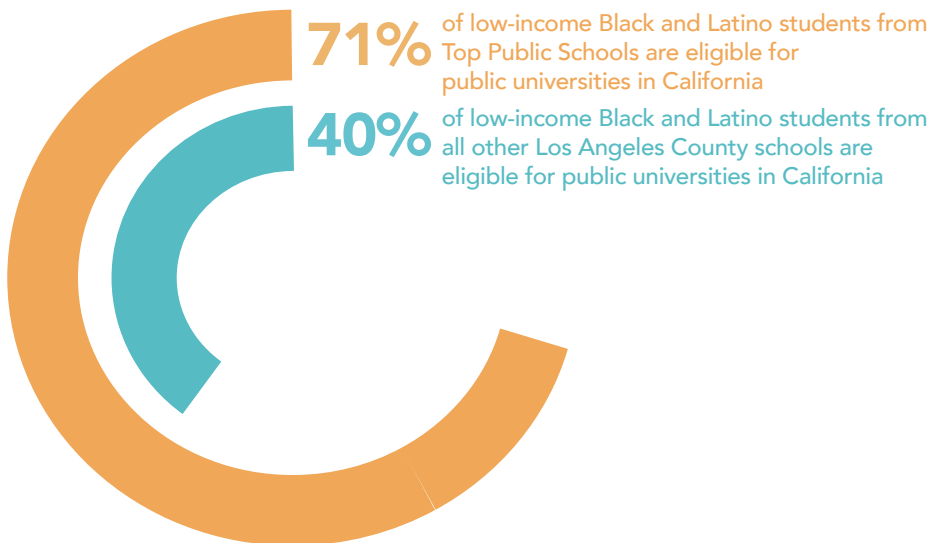

There are 1 million low-income  
Black and Latino students in Los Angeles County

**15%**  
of them  
are enrolled in a  
Top Public School

2017-18 Enrollment files

### Low-income black and latino students attending top public schools in Los Angeles County have a better chance of getting into college

Source: California Department of Education, four-year cohort graduation rates and University of California/California State University (UC/CSU) eligibility requirements, 2017-18

**There is no question that every student deserves a high quality education that prepares them for college. In fact, 94% of students see college in their future.**

In California, students must complete 15 course requirements called A through G (A-G) in order to be eligible to apply to a four-year public college, either in the California State University (CSU) or University of California (UC) systems. Students must take and pass the A-G courses with a grade of C or better. In Los Angeles County, many districts have adopted A-G courses as a graduation requirement to get most students to public universities. However, gaps remain.

In Los Angeles County, 45% of African American graduates and 52% of Latino graduates are eligible for a UC/CSU, compared to 62% of White graduates. The high schools that made our list are closing these gaps, with 71% of low-income African American and Latino students eligible for a UC/CSU.

Though we're far from delivering on the promise of an excellent education for all students, this list highlights the schools that are leading the way when it comes to preparing students for college.

## All school “types” can be successful

There isn’t one single program or model that leads to the remarkable results these schools have accomplished. In fact, all school governance models -- traditional district, charter, and other magnet or pilot models -- are represented in Los Angeles County’s Top Public Schools. What you’ll find over the next several pages is that Los Angeles County is leading the way on educational equity within many different types of schools.

### School Sample Breakdown by School Designation or Governance Type

SCHOOL DESIGNATION/ GOVERNANCE TYPE	NUMBER OF LOS ANGELES PUBLIC SCHOOLS	NUMBER OF 2019 TOP PUBLIC SCHOOLS
Public district	1,648	195
Public charter	368	75
Alternative school of choice <sup>4</sup>	52	9
<b>TOTAL</b>	<b>2,068</b>	<b>279</b>
